A fresh graduate with a associate degree in Medical Laboratory Technology from Rajawali Health Institute in Bandung, graduating in 2025. As a graduate of Medical Laboratory Technology, I have the ability to perform accurate health analyses. Had an internship experience at several clinical practice settings as an intern at two hospitals and one community health center. I managed to balance these responsibilities with my academic commitments, enabling me to graduate on time with a good GPA. With these qualifications, I am confident that I can contribute to the company's growth.
